

# Basic Sales Summary Report

This report shows the total quantity sold and total revenue generated per product, using SQLite database queries and Python analysis.

| Product | Total Quantity | Revenue  |
|---------|----------------|----------|
| Laptop  | 5              | 306000.0 |
| Phone   | 8              | 166000.0 |
| Tablet  | 10             | 155000.0 |

Observation: Laptops generated the highest revenue, followed by Phones and Tablets. This insight can help businesses focus on products that drive the most revenue.
